MY PERSONAL COMPUTER

我的個人電腦大公開

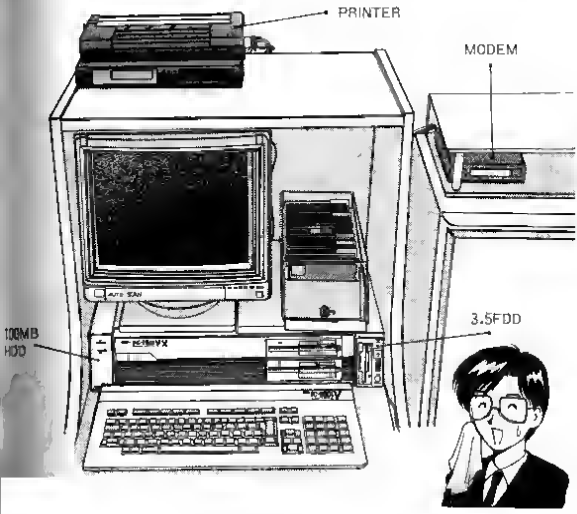
KEN AKAMATSU (25)



Due to the curiosity of the readers, I, Ken Akamatsu, will tell you a little bit about my personal computer, first of all. my computer is a bit out of date, the model is a 98VX4. The CPU is a 286 (8MHz). The monitor is broken, booting up takes at least one and a half minute to kick in. Umm... the Hard Disk is 100MB. DTP and the other Hard Drive is working fine. The modem is only 2400bps, and the printer runs on thermal-paper. Oh well, I'm too poor...

*NOTE: SUCKS TO BE HIM :P
